

Time for the Next Level

Word by Greg Bitely, Jan 31, 2010

"For it is time," saith the Lord, "to come up to the next level. To come up to this higher place that I have for you. You gone step by step. You have come higher and higher and higher. But now it is time to come up to this level. To come up to this place unto Me," saith the Lord. "For I am calling you and I am drawing you. Step out in faith. Step out with your words. Step out with your actions and yea you will begin to see things come to pass that you haven't seen in a long time. Things will begin to happen, even this year. Things that you thought might be years down the road, that will happen this year. Things not only in the church, but also yea in personal lives because of your association with this place, things that have thought of to be in the distant future shall be in the near future," saith the Lord.

"You have got to give God something to work with. Give Him something to work with. Begin to put some thoughts together. This is for more than just the church. This is for people to. For the Lord is ready to Explode upon you! But give Him something to work with. Begin to declare. Begin to speak. Begin to act. Step out now. It is time. Don't drag your feet and don't be just real slow about it. Pick up the pace because you are in a race! For I will never come to you with a Spirit of Fear. But your relatives and those that have come unto Me," saith the Lord, "and have gone before, they cheer you on. For there is a cloud of witnesses that are here as you run your race. Set before My face and you will accomplish and you will full fill what I have set before you," saith the Lord. "So as they did in times of old, they girded themselves up. They picked themselves up in a way that they could run. Take off the things that bind you. Take off the things that would slow you down. Take off even as it were your coat, gird yourself up and run."

Do not be concerned about gain. Because if you will follow My plan, there will always be gain. There will always be increase that you need. Because if you follow your plan, your plan will fail. Your plan will not be met with success. But when you follow My plan, then you will have success.
